

Dear FCC Commissioners,

I am writing to urge you to reject the NAB's petition 04-160. As a former broadcaster and a radio lover, I have been disappointed with local radio's ability to provide variety and local information. Satellite radio, with its variety of programs, has finally got the attention of radio broadcast owners. But, now is not the time to stifle competition. If radio broadcast companies really want to provide quality local programming, then they shouldn't be scared of satellite radio. Let the competition continue. It's good for all of us!
